

# KSENIYA KRAVCHUK

## FRONT END DEVELOPER

k.kravchuk.dev@gmail.com · +1(425)389-9098 · <https://www.linkedin.com/in/kseniya-kravchuk/>

## PROFESSIONAL SUMMARY

Front end Developer with more than 3 years' experience. I have been working with the most popular frontend technologies such as TypeScript, React, Angular and Vue. Participated in the projects developed by teams consisting of 5-7 members, actively working with Agile methodology, using Gitflow concept as a main way to track the code changes.

## TECHNOLOGY SUMMARY

Languages:	JavaScript/TypeScript
Frontend:	ES6, HTML, CSS, React, Angular, VueJS, Bootstrap, Nebular library
Methodology:	GitFlow, Agile
Version Control:	Git
Other:	Webpack, Gulp, SQL, GraphQL, Postman, Insomnia, Figma, Photoshop, JIRA
Platforms:	MacOS, Microsoft

## PROFESSIONAL EXPERIENCE

AUGUST 2019 – MAY 2022

**FRONTEND DEVELOPER**, HAPPY MONDAY -> QVANT

The company has a few products for showing advertisement banners on the clients' websites and video advertisement on billboards. The UI parts of these projects are based on Angular 12. Our team consisted of 4 developers including the team leader. I always was in touch with the backend and QA teams. Our team used Gitflow and Agile with 2-weeks sprints. Also participated in developing of a Vue.js application.

### Responsibilities:

- To convert mobile and desktop advertising banners from Photoshop or Figma layouts to HTML representation using CSS and Vanilla JavaScript
- To create templates for new formats of mobile and desktop banners
- To develop company's website using Bootstrap, Gulp
- To develop and maintain Angular components library based on Nebular components
- To develop new feature and fix bugs
- To conduct code reviews
- To attend daily and estimation meetings
- To write and maintain projects' documentation
- To take a part in deployment

### Personal results:

- Developed 60+ advertisement banners. There were both simple banners and complex (interactive, gaming banners)
- Used modern HTML and CSS abilities like canvas, iframe, svg, sprite, animation
- Developed new demo stand for banners
- Used new technologies like Bootstrap, Gulp
- Started working with Angular: routing, components, services, pipes
- Promoted to Angular developer
- Developed 15+ new Angular components from scratch
- Completed 50+ merge requests with new features, bug fixes

- Migrated 4 complex components from an existing Angular 12 application to a Vue.js application
- Managed to successfully perform the project tasks remotely for 2 years (since the pandemic started till present)

**APRIL 2019 – JULY 2019**

### **JUNIOR FRONTEND DEVELOPER, REAL FARM**

The product was a small start-up creating a Single Page Application for selling farm organic food online. It was my first commercial experience. Our team used React for application frontend part.

#### Responsibilities:

- To develop the UI part of SPA using React
- To collaborate with the designer using Figma
- To use GraphQL for making requests to the server

#### Personal results:

- Started working with React
- Learned and successfully started to apply Gitflow concepts
- Used modern ES6 features like arrow function, spreading, distraction, promises
- Learned how to initialize new project and build it
- Learned how to get data from server and display it on the frontend part

## **EDUCATION**

**JUL 2011**

### **MASTER'S DEGREE IN MATHEMATICS, TYUMEN STATE UNIVERSITY**
